## PROFILE

Senior Ruby developer with 15 years experience building web applications and managing software development projects and teams. Full-stack experience and strong proponent of Test Driven Development and Pair Programming.

## EXPERIENCE

### **Co-owner at Kinetic Web Solutions, Limerick, PA (Jan 2001 - Jun 2010)**

In 2001, I founded a web development firm. I took on a partner and grew it to 10 full-time employees. In 2006, I converted our operations from Microsoft ASP to Ruby on Rails and transitioned us to a Rails consultancy. I was responsible for all day-to-day operations, sales, marketing, and project management. I was a developer and oversaw all development, engineering, and systems administration.

### **Senior Consultant at Xforty Technologies, Limerick, PA (Jun 2010 - Sep 2011)**

In 2010, I sold Kinetic and began consulting with friends at Xforty. I worked on several Rails applications large and small and dabbled in some PHP and other projects. In January 2011, I obtained Loosecubes as a customer and moved to New York to contract with them full-time for 9 months.

### **Lead Developer at Loosecubes, Brooklyn, NY (Jan 2011 - July 2012)**

Loosecubes hired me in September 2011 to lead their development team. I was involved with nearly all aspects of their Rails application since the beginning. For a time, I was their sole developer and, for a time, I worked on-site with an outsourced team at Hashrocket in Jacksonville, FL. I helped to train numerous engineers and shape development strategy for this early-stage start-up.

## SKILLS

Expert level Ruby and Rails experience. Full-stack developer proficient in JavaScript. Specializing in Test Driven Development, with significant experience introducing teams to TDD best-practices. Advanced Git, Rspec, and Cucumber experience and intermediary Linux systems administration abilities. Recent advanced Heroku experience and experience with Amazon EC2, Engine Yard, and RackSpace Cloud services, as well as self-hosted environments.

## COMMUNITY

Organizer of the Philly on Rails Ruby user group 2008 to 2011 and frequent presenter. Contributor to Rails and other open source projects.

## EDUCATION

Business and IT major at Northeastern University, Boston, MA (2001)

## INTERESTS

Traveling, cooking, dogs, reading, Russia. Proficient in conversational Russian.
